

TECHNICAL DATA SHEET DEFOAMER 87 0556

APPLICATION

Defoamer for water-based flexographic and gravure inks and varnishes.

SPECIAL CHARACTERISTICS

- Prevents foaming when printing W/B Inks
- This press-side additive addresses foaming due to shear on press

PROPERTIES

Defoamer must be mixed in thoroughly or sprayed directly on to the foam. Care must be taken to avoid excessive addition, which can lead to crater formation. Recommended dosing levels are between 0.1 – 0.3%. Container should be stirred well prior to use to ensure uniformity. Please refer to MSDS for full handling protocols.

PACKAGING

Plastic Jugs	4 kg	28.6 lb
Plastic Jugs	10 kg	22 lb
