

TECHNICAL DATA SHEET

UV TEMP – ULTRAVIOLET CURED FLEXO INK SYSTEM

APPLICATION

UV Temp is a radiation cured Flexo Ink System. Offered in both a regular line for paper/board Substrates and a line for more flexible poly/foil Substrates.

SPECIAL CHARACTERISTICS

- Both UV Temp Regular Line and PVC Line are low viscosity, offering good flow qualities
- Available in full range of shades, offering high strength for very fine line process printing.
- Easy to cure, even at full strength with heavier ink film weight
- Excellent gloss
- Full resistance qualities
- Low odour and low maintenance required on press
- Foam controlled
- Easy clean up on press

PROPERTIES

Pre-testing and qualification necessary for any non-absorbent substrates to ensure full ink performance to final end use requirements

LIGHTFAST RATING : GENERAL – MINIMUM BLUE WOOL SCALE - 3

Reducer and Balanced Extender available to lower viscosity or reduce strength

PACKAGING

Plastic Jugs (Opaque)	4 kg	8.8 lb
Plastic Kits (Opaque)	18 kg	39.6 lb
