

## TECHNICAL DATA SHEET WAX ADDITIVE 87 0665

### APPLICATION

87 0665 is a Wax Additive for Water-based Inks and Coatings. It is a Polyethylene Wax Dispersion, which is meant to supplement the wax already contained in the system extenders for enhanced dry rub resistance. This additive acts without adversely affecting the printed gloss obtained.

Adding Polyethylene Wax to ink will provide for best surface protection possible, without coating. Will not affect suitability for coating. Recommended addition levels would range from 0.5% to 4.0%.

### SPECIAL CHARACTERISTICS

- Compatible with all Hostmann-Steinberg system Extenders
- Easily mixed into inks
- Small addition will improve dry rub resistance on porous substrates, where no coating is applied.
- Low viscosity and no odour with addition

### PACKAGING

Plastic Kits	18.0 kg	39.6 lb
Drums	200.0 kg	440.0 lb
