

TECHNICAL DATA SHEET HYDROFIX[®]-B

PRODUCT LINE

8013 39 **FOR WATER WITH A BICARBONATE CONTENT ABOVE
400 PPM**

APPLICATION

Fountain solution additive for UV curing ink systems printing on non-absorbent substrates. UV curing ink systems demand fountain solution additives that meet the requirements of the process to the best possible extent. **HYDROFIX[®]-B** is a proven product suitable for all dampening units commonly in use.

When used in alcohol dampening units, between 5 – 8% alcohol (isopropanol) is required.

SPECIAL CHARACTERISTICS

- Enables the formation of a stable film of dampening solution.
- Provides good protection of the printing plates.
- FOGRA approved.

PROPERTIES

Product Line	Dosage	pH	Conductivity
8013 39	2 % (2.6 oz/US gallon)	5.0 – 5.3	600 - 800 above water, before alcohol

PACKAGING

Plastic Jug 2.5 US gallon 9.46 L

Plastic Drum 55.0 US gallon 208.1 L
