

TECHNICAL DATA SHEET HYDROFIX[®]-K

PRODUCT LINE

8032 49 **FOR PROCESSING UV CURING INK SYSTEMS ON
ABSORBENT STOCKS**

APPLICATION

UV curing ink systems demand fountain solution additives that meet the requirements of the process to the best possible extent. **HYDROFIX[®]-K** is a proven product suitable for all dampening units commonly in use.

When used in alcohol dampening units, between 5 – 8% alcohol (isopropanol) is required.

SPECIAL CHARACTERISTICS

- Enables the formation of a stable film of dampening solution.
- Provides good protection of the printing plates.
- Stabilizes UV ink on a low level of emulsification.

PROPERTIES

Product Line	Dosage	pH	Conductivity
8032 49	2% (2.6 oz/US gallon)	5.0 – 5.3	600 - 800 above water, before alcohol

PACKAGING

Plastic Jug 2.5 US gallon 9.46 L
Plastic Drum 55.0 US gallon 208.1 L
