

TECHNICAL DATA SHEET SYSTEM CLEANER

PRODUCT LINE

8080 09 CLEANING CONCENTRATE FOR DAMPENING SYSTEMS

APPLICATION

System Cleaner is used for thorough cleaning of fountain solution delivery and dampening units with circulating systems. **System Cleaner** contains a combination of highly effective wetting and anti-microbial agents. It removes ink residue and dirt caused by the growth of microbes. **System Cleaner** is recommended for non-contacting spray and turbo dampening units as well as for contact dampening units.

Research has shown that it is advisable to include cleaning of the dampening circulation systems in the machine maintenance program and to implement it once or twice a year.

SPECIAL CHARACTERISTICS

- Highly active wetting agents dissolve contamination and persistent ink residues adhering to the walls of the piping system.
- Emulsifiers dissipate contamination uniformly in the cleaning solution.
- Effective anti-microbial agents destroy microbial growth.
- System Cleaner does not attack metals or plastic materials.
- System Cleaner adjusts pH to be alkaline.

PROPERTIES

Product Line	Dosage	Cleaning Time
8080 09	Dilute to 5% cleaner, 95% water. <i>Note: shake before use</i>	Pump solution for 2 – 3 hours, flush with water 2 – 3 times

PACKAGING

Plastic Jug 2.5 US gallon 9.46 L
