

TECHNICAL DATA SHEET UV REACTA PRO UE 7020

PRODUCT LINE

41 UE 7020	UV REACTA PRO YELLOW
42 UE 7020	UV REACTA PRO MAGENTA
43 UE 7020	UV REACTA PRO CYAN
49 UE 7020	UV REACTA PRO BLACK

APPLICATION

The **UV REACTA UE 7020** is an excellent product for most UV applications. UE 7020 cures to a hard finish, with or without coating, while suitable for virtually all post-printing processes, such as lamination. The product has been formulated for application on both sheetfed and web applications with no misting and excellent press stability. The **UV REACTA UE 7020** is suitable for printing on a wide range of substrates, including many treated PE and PP substrates, as well as matte coated and uncoated substrates.

SPECIAL CHARACTERISTICS

- High colour intensity
- Rapid adjustment to ink/water balance
- Quick curing
- Suitable for both inter-station curing and wet trapping
- Suitable for both web and sheetfed applications
